RESEARCH EXPERIENCE

10/09/2013 – 10/09/2015

Researcher – Breast Cancer, Prostate Cancer & Glandular Cancer Gene Therapy

Led preclinical studies on breast cancer, prostate cancer, and glandular cancer focusing on gene therapy and non-invasive therapeutic techniques such as High-Intensity Focused Ultrasound (HIFU) and electromagnetic field systems. Developed and tested innovative approaches to target gene modulation for improving treatment efficacy in cancer therapies. Collaborated with multidisciplinary teams to assess the cellular impact of electromagnetic field therapy in cancer cells and investigate potential synergistic effects with gene-targeted treatments.

05/04/2016 – 31/08/2018

Visiting Researcher – National Nuclear Research Institute (NSRTI), Tehran

Conducted immunological and serological experiments to evaluate cellular and systemic responses to ionizing radiation. Worked with preclinical biological models to investigate radiation-induced tissue damage, immune modulation, and long-term physiological effects.

Assisted in experimental design, sample collection, ELISA-based cytokine profiling, and serological marker analysis.

Focused on translational research aimed at understanding health risks associated with high-radiation environments.
